

How to reset the [Default Domain Policy](#) and [Default Domain Controllers Policy](#)

Introduction

Learn how to reset the Default Domain Policy and the Default Domain Controllers Policy back to their default settings. In this example, I show you how to use the `dcgpofix` command to reset the Default Domain Policy and the Default Domain Controllers Policy back to their default settings.

Warning

1. Before you run any of the below commands to reset the Default Domain Policy or Default Domain Controller Policy, make sure that you take a backup of the configuration before you make any changes. This will enable you to restore the policies if there are any issues.
2. Audit every setting with the policy you are going to reset and confirm that they are either no-longer needed or the setting has been migrated to a different group policy object.

PowerShell: Reset Default Domain Policy GPO

Run the following command to reset the Default Domain Policy GPO:

```
dcgpofix /ignoreschema /target:domain
```

Reset Default Domain Controllers Policy GPO

Run the following command to reset the Default Domain Controllers Policy GPO:

```
dcgpofix /ignoreschema /target:dc
```

Reset Default Domain Policy GPO and Default Domain Controllers Policy GPO

Run the following command to reset the both the Default Domain Policy GPO and the Default Domain Controllers Policy GPO at the same time:

```
dcgpofix /ignoreschema /target:both
```

Windows Start menü / jobb egér / Windows Powershell (**Rendszergazda**) után:
PS C:\Users\Rendszergazda> **dcgpofix /ignoreschema /target:domain**
Microsoft(R) Windows(R) Operating System Default Group Policy Restore Utility v5.1
Copyright (C) Microsoft Corporation. 1981-2003
Description: Recreates the Default Group Policy Objects (GPOs) for a domain
Syntax: DcGPOFix [/ignoreschema] [/Target: Domain | DC | BOTH]

This utility can restore either or both the Default Domain Policy or the Default Domain Controllers Policy to the state that exists immediately after domain creation. You must be a domain administrator to perform this operation.

WARNING: YOU WILL LOSE ANY CHANGES YOU HAVE MADE TO THESE GPOs. THIS UTILITY IS INTENDED ONLY FOR DISASTER RECOVERY PURPOSES.

You are about to restore Default Domain Policy for the following domain:
newyork.local

Do you want to continue: <Y/N>? **y**

WARNING: This operation will replace all 'User Rights Assignments' made in the chosen GPOs. This might cause some server applications to fail. Do you want to continue: <Y/N>? **y**

The Default Domain Policy was restored successfully

Note: Only the contents of the Default Domain Policy were restored. Group Policy links to this Group Policy Object were not altered.

By default, the Default Domain Policy is linked to the domain.
